

Fibre optic patch cords

FO-C SC/APC-LC/PC series

art. 19-418

FO-C SC/APC-LC/PC mt.3

Single-mode fibre optic patch cords with one SC/APC connector and one LC/PC connector, realized with LSZH sheath (Low Smoke Zero Halogen).

Thanks to their reduced thickness and the dielectric material of which they are composed, which makes them immune to electromagnetic interference, fibre optics can be inserted in electrical cables ducts.

Also, in a distribution network, they don't require equipotential grounding.

They assure a very low attenuation and a high transmission bandwidth.

Code	19-418A	
Item	FO-C SC/APC-LC/PC mt.3	
Length	m	3
Ø patch cord	mm	2,8
Medium attenuation	dB/Km	0,3
Type of connectors	no.1 SC/APC e no.1 LC/PC	
Ø LC/PC connectors	mm	6
Ø SC/APC connectors	mm	10
Type of fibre optic for wiring	single mode 9/125	
Packaging dimensions (LxWxH)	mm	160x160x10
Packaging weight (LxWxH)	Kg	0,05
